Mark Beaty, MD, Founder of Beaty Facial Plastic Surgery, was initially drawn to facial plastic surgery by friends in the field. The blend of precision and creativity has kept him there.

“As I progressed in training and knowledge, facial plastic surgery had the right mix of technical challenge, opportunity for artistic expression and impact on patients’ lives for me,” shared Beaty.

Beaty has been impacting his patients’ lives for decades, and at Beaty Facial Plastic Surgery since 2011. The double board-certified facial plastic surgeon specializes in rhinoplasty and cosmetic surgery of the face and neck, and takes a patient-centered approach to his practice.

A Castle Connolly Top Doctor since 2020, Beaty’s excellence and innovation speak for themselves: a thriving practice with clients from across the world, including other physicians, entertainers and professional athletes. He’s a frequent speaker at national and international facial plastic surgery meetings, and has trademarked his innovative technique, the ProLIFT facelift, to ensure the best result with the least intervention for each individual patient.

Serving a diverse array of clients is a family affair for Beaty – his wife, Dr. Laura Beaty, joined Beaty Facial Plastic Surgery in 2018 and rounds out the nonsurgical anti-aging treatment offerings at the practice. Together, the Beatys are active in the Atlanta community through organizations like the Besharat Arts Foundation and Lost-n-Found Youth.

After decades in the field, Beaty remains inspired by “seeing patients regain or expand their confidence and self esteem as their physical appearance better reflects the vibrant person they are on the inside.”
