Dr. Laura Beaty, family medicine physician and wellness director at Beaty Facial Plastic Surgery, has dedicated her career to providing exceptional medical care to the Atlanta community.

Dr. Beaty's passion for medicine started in third grade, when she decided to become a physician, though she isn't sure why. "I love the range of things I can offer as a family medicine physician," she says, highlighting her versatile skill set that spans from aesthetics to urgent care to wellness seminars.

She is actively involved in her community. In addition to offering aesthetic services, health education and workplace wellness seminars, Dr. Beaty says, "I began working in the Northside Urgent Care Centers during the pandemic and have continued to do a few shifts per month to keep my skills sharp and my ear to the ground as to the needs of the community." She is also working toward becoming an American Red Cross volunteer.

As a female physician, Dr. Beaty believes women bring unique strengths to patient care. "Women physicians are better listeners, and that has proven to improve patient outcomes," she shares. Despite this, she notes that women are often paid less due to spending more time with patients.

Dr. Beaty recently launched a community health newsletter, MDSpin.com, and continues to expand her services at Beaty Facial Plastic Surgery.
