APPEARANCE.
HEALTH. SUCCESS.

ENHANCE, CONTOUR, AND PREPARE!

February is the perfect time to focus on subtle enhancements and long term results. This month's newsletter highlights the different ways to enhance the lip area, introduces our newest body-contouring technology, and helps patients plan ahead for a confident, summer ready look.

FEBRUARY NEWSLETTER

BEATY FACIAL PLASTIC SURGERY

HOW TO ENHANCE THE LIP AREA

Lip enhancement is not limited to just one treatment. Depending on anatomy, goals, and desired outcome, there are multiple approaches.

Whether that's surgical or non-surgical, both can improve shape, balance, and overall appearance.

Lip Filler

- Non-surgical injection that adds volume and improves shape.
- Enhances symmetry and definition.

Lip Lift

- Surgical option that shortens the distance between the nose and upper lip.
- Creates a more youthful, lifted appearance.

Lip Flip/Neurotoxins

- Non-surgical injection that relaxes muscles around the mouth.
- Helps soften fine lines and downward pull.
- During a Lip Flip, neurotoxins are placed in the upper lip to gently roll it outward.
- Can be paired with lip filler for balanced, natural looking results.

Call our office at (770) 753-0053 to book a consultation to determine which lip procedure can best fit your needs!

BEST NONSURGICAL APPROACH

For patients seeking natural looking lip enhancements without surgery, the most effective approach is often a combination of treatments. Rather than relying on filler alone, pairing lip filler with a lip flip allows for improved balance, shape, and subtle definition while avoiding an overfilled appearance.

TECHNOLOGY HIGHLIGHT

COOLSCULPTING ELITE

Book now to
get summer
ready!

Pair with our
Weightloss
Program!

COOLSCULPTING ELITE

CoolSculpting Elite is the newest advancements in non-invasive body contouring, designed to deliver more effective fat reduction with a more comfortable treatment experience. This advanced technology features dual applicators that treat two areas at once, reducing overall treatment time, along with new C-shaped applicators that fit more fat than traditional U-shaped designs for improved efficiency and contouring. Beginning treatments now allows adequate time for results to develop, making CoolSculpting Elite an ideal option for patients looking to prepare their body for summer.

NONSURGICAL HIGHLIGHT: GLACĒ FACIAL

Have you heard about our latest new service? The Glacē facial is our newest nonsurgical treatment, designed to elevate the traditional HydroFacial by combining exfoliation, detoxification, and sculpting for immediate and visible results. This multi-step approach targets both the surface of the skin and underlying circulation to enhance clarity, contour, and overall skin vitality.

GLACĒ TREATMENT BREAKDOWN

- **Advanced HydroFacial with Micro-Abrasions**
 - Gently exfoliates while deeply cleansing and hydrating the skin.
- **Lymphatic Drainage**
 - Reduces puffiness and supports detoxification.
- **LED Light Therapy**
 - Calms inflammation and promotes skin rejuvenation .
- **Facial Cupping Treatment**
 - Enhances circulation and improves facial contour.

Ideal for Patients Seeking:

- Improved texture and tone.
- Reduced inflammation and puffiness.
- A refreshed, sculpted glow with no downtime.
